INFORMATION BULLETIN

NEW Fram Fluid Testing

Fluid testing with **FRAM Fluid Analysis Laboratories** will now be faster and easier. With multiple laboratories strategically located across the country, a laboratory is accessible by ground transit within 48 hours from anywhere within the continental United States.

Our new online reporting software now provides access to your test results almost immediately after processing is complete. Data analysts are available during regular business hours to answer questions and assist you in understanding your results.

To provide you with the best analytical services available, our sample jar labels and component registration forms have been re-designed to increase the clarity and accuracy of the sample information you submit to our laboratory.

Rest assured we will continue to process the test kits you currently have in inventory until December 31, 2008.

Please send these kits to the laboratory location nearest you listed below.
